UDIT CHHIPA

u/

CYBER SECURITY RESEARCHER | AI SYSTEMS | THREAT INTELLIGENCE

Jaipur, India | uditchhipa007@gmail.com | +91-7852091947 uditchhipa.click

PROFILE

Computer Science (Cybersecurity) student and cyber security researcher focused on threat emulation, defensive research, OSINT investigations, and AI-assisted systems for law enforcement.

EDUCATION

Jaipur National University

B.Tech, Computer Science (Cybersecurity)
2023 - 2027 | CGPA: 7.8

TECHNICAL SKILLS

Languages: C, C++, Python, Rust

Security: C2 development, implant engineering, process injection, syscall research, UAC bypass

Detection research: AV/EDR evasion, AMSI/ETW patching, sleep obfuscation, stack spoofing, binary obfuscation

Threat intel: MITRE ATT&CK, dark web monitoring, Telegram OSINT, intelligence aggregation

AI security: LLM workflows, VLM systems, ML malware detection, agentic AI

Tools: Burp Suite, Wireshark, Nmap, Nessus, Metasploit, Ghidra, Docker, Linux

EXPERIENCE

Rajasthan Police - Cyber Crime Branch

Apr 2024 - Present

Cyber Security Research Intern | Jaipur

- Built LLM-powered agentic investigation systems and VLM-based weapon detection using domain-specific datasets.
- Designed ML models for cybercrime detection, Telegram OSINT, and criminal network analysis pipelines.
- Presented research prototypes to Cyber Crime teams; received a Letter of Recommendation from Rajasthan Police HQ.

ShadowFox - Cybersecurity Training & Services

Jul - Aug 2025

Cyber Security Intern | Remote

- Performed web application vulnerability assessments using Burp Suite, Nessus, and Nmap; tested REST API auth flaws.
- Conducted OSINT reconnaissance, Wireshark traffic analysis, and incident reporting for exposed assets.

SELECTED RESEARCH

NEBULA - Threat Emulation Research

Rust, Windows API FFI | 2025 - Present

Threat-emulation implant research covering 11+ AV/EDR evasion techniques and 26+ sandbox/VM detection checks. Studied multi-channel C2 fallback design.

BLACKOUT-WINDOWS - C2 Architecture Research

Python, C#, Windows Internals | 2024 - Present

Research framework for Windows internals and detection-evasion experiments, including syscall resolution, process hollowing, BYOVD discovery, and steganographic concealment.

PHANTOM-INTEL - Threat Intelligence Platform

Python, OSINT, AI/ML | 2024 - 2025

Automated dark-web monitoring, BIN leak detection, MITRE ATT&CK attribution, and geopolitical threat mapping across 190+ countries.

ACHIEVEMENTS

- Letter of Recommendation from Rajasthan Police HQ for AI-assisted cybercrime investigation research.
- 6th rank in university-wide CTF.
